QuARTZ by ACO

Art & Design

The new range of **QuARTz by ACO** bathroom drainage systems opens up the creativity process, enabling freedom of design and movement.

QuARTz by ACO provides a visually compatible range of bathroom drainage products, creating a completely coordinated design. A choice of floor wastes are available for use in the shower area (ShowerPoint), or bathroom floor (CentrePoint). These can be used alongside a ShowerChannel to complete a three-fold integrated design scheme.

ShowerChannels are compatible with traditional style showers with a step, or barrier free design. Units can be positioned anywhere within the base of the shower, as a threshold; against the wall; or wherever the layout allows.

The luxurious, electropolished stainless steel channels and floor wastes complement the latest in lavish bathroom design, with the performance and finish expected from the world-leading drainage manufacturer.

Simple, one-way falls allow for easy tiling

ShowerChannel

Length – choice of 6 standard lengths; 700mm, 800mm, 900mm, 1000mm, 1200mm and 1400mm.

Stainless Steel – all bodies are manufactured from stainless steel and are electropolished for enhanced aesthetics and hygiene.

Integrated Outlet – choice of centre or end outlet positions.

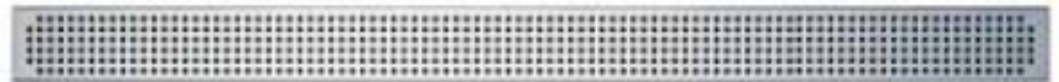

Accessories – optional items are available to assist maintenance.

LED Light Option – water-activated light options available in red, blue, green or rainbow to add ambience.
